

INFORMED CONSENT TO CHIROPRACTIC TREATMENT

Chiropractic treatment, including spinal adjustment, has been the subject of government reports and multi-disciplinary studies conducted over many years and have been demonstrated to be highly effective treatment for spinal pain, headaches and other symptoms. Chiropractic care also contributes to your overall well-being. The risk of injuries or complications from chiropractic treatment is substantially lower than that associated with many medical or other treatments, medications, and procedures given for the same symptoms.

As with everything, there are risks and possible risks associated with manual therapy techniques used by medical doctors, doctors of chiropractic, massage therapists, and physiotherapists.

a. While rare, some patients may experience short-term aggravation of symptoms or muscle and ligament strains or sprains as a result of manual therapy techniques such as spinal adjustments. Although uncommon, rib fractures have also been known to occur following certain manual therapy procedures;

b. There have been reported cases of stroke associated with visits to medical doctors and chiropractors. Research and scientific evidence does not establish a cause and effect relationship between medical and chiropractic treatment and the occurrence of stroke. Recent studies suggest that patients may be consulting medical doctors and chiropractors when they are in the early stages of a stroke. In essence, there is a stroke already in progress. However, you are being informed of this reported association because a stroke may cause serious neurological impairment or even death. The possibility of such injuries occurring in association with upper cervical adjustment is extremely remote;

c. There have been reported cases of disc injuries identified following cervical and lumbar spinal adjustment, although no scientific evidence has demonstrated such injuries are caused, or may be caused, by spinal adjustments or other chiropractic treatment;

d. There are infrequent reported cases of burns or skin irritation in association with the use of some types of electrical therapy offered by some doctors of chiropractic

I acknowledge I have read this consent and I have discussed, or have been offered the opportunity to discuss, with my chiropractor the nature and purpose of chiropractic treatment in general, (including spinal adjustment), the treatment options and recommendations for my condition, and the contents of this consent. I consent to the chiropractic treatment recommended to me by my chiropractor including any recommended spinal adjustments. I intend this consent to apply to all my present and future chiropractic care.
